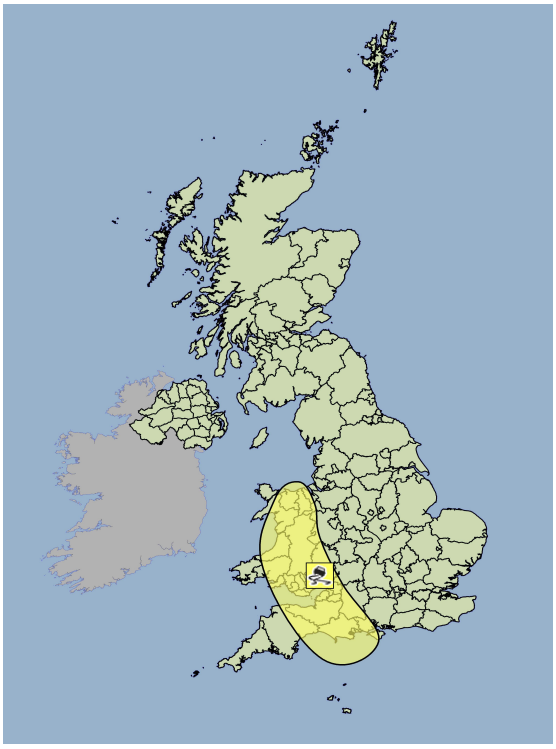
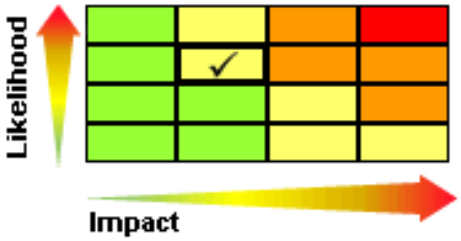
National Severe Weather Warning Service





Chief Forecasters Assessment
Outbreaks of rain across the SW of England and Wales on Monday morning have led to saturated ground, whilst roads and pavements are expected to remain wet in places into Monday night due to seepage and run off from fields. With skies slowly clearing from the east overnight, as cold air from the continent spreads west, temperatures are expected to steadily fall leading to a frost and some icy patches developing.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **21:00 on Mon, 18th Jan 2016** until **09:00 on Tue, 19th Jan 2016**

After a very wet morning some surfaces will remain wet due to run off and seepage on Monday night and Tuesday morning. With temperatures expected to fall close to or below freezing this is likely to lead to some icy patches forming.

Please be aware that this may lead to some low level disruption to travel.
